

## **AP Spanish Assignment**

The AP Spanish summer assignment is to read and summarize newspaper articles from Spanish speaking countries. Dr. DiMaggio will assign each student a country in the Spanish speaking world from which they must access ten articles over the course of the summer from newspapers published in that particular country. Students are to read the articles, note words that they do not understand, define those words, summarize each article in Spanish and write a critical response to each article in Spanish.

- A summary is a brief statement or account of the main points of the article.
- A critical response provides a thorough explanation of your understanding of the article including the author's opinion, use of style, writing method or expression. You do not have to agree or disagree with the article, rather just explain at a deeper level what the author/columnist/reporter is trying to say or describe as the purpose of the article.
